

WEBSITE SERVICE - NEW OR REDESIGNED WORKFLOW / STANDARD TIER

Focused Workflow Build

Operational workflow + dashboard

PACKAGE PRICE	DELIVERY TARGET
\$199	7-day target

Current markdown: 20% off the genuine prior package price of \$249. Save \$50.

A defined scope. A practical process. A handoff you can use.

What this package is designed to do

PACKAGE PRICE \$199 7-day target	ORIGINAL PACKAGE PRICE \$249 20% OFF - SAVE \$50
--	--

Best for An independent professional or small team with one defined business process that needs stronger workflow logic, visibility, and a usable handoff.	Not intended for An enterprise system, several distinct workflows, complex migration, outside-tool automation, or indefinite product management.
---	---

Scope included

- One defined business workflow
- Workflow and decision mapping
- One operating dashboard
- One core database architecture
- Purpose-built views and one reusable template
- Testing, documentation, and one revision

What you receive

- Approved workflow map
- Working dashboard and core database
- Views aligned to roles, stages, or decisions
- Reusable template with guidance
- Test results and operating documentation
- One organized revision round

How the work moves from scope to handoff

1. Scope	Confirm the users, workflow stages, source information, decisions, permissions, and success criteria for one defined operating path.
2. Map	Translate the real process into statuses, properties, views, templates, and handoffs before building.
3. Build	Create the approved Notion pages and databases with clean naming, usable defaults, and representative test records.
4. Test	Run the workflow through realistic scenarios, correct in-scope issues, and prepare concise operating guidance.
5. Handoff	Walk through the finished system, collect organized feedback, complete included revisions, and transfer ownership.

What the client provides

- Process owner, users, stages, and decision rules
- Representative examples and required reporting signals
- Known constraints and items that must be preserved
- Appropriate Notion access and a current backup
- One consolidated feedback response

Access, communication, and schedule

Project details, access, schedule, deliverables, and payment terms are confirmed in writing before work begins. The delivery target begins after the required access, source material, and scope decisions are available. Delayed access or feedback can move the delivery date. Flow Work Systems requests the minimum access needed and does not need passwords shared by email.

Client review points

The client confirms the scope before work starts, answers blocking questions during the project, reviews the delivered work, and provides consolidated feedback. Consequential business decisions, permissions, records, and AI-supported output remain subject to the client's human review and approval.

Commercial terms and practical boundaries

Revisions and acceptance

One revision is included. Refinements must stay within the approved workflow, dashboard, core database, views, and template.

Out of scope and change triggers

- A second connected database
- Multiple unrelated workflows or department-wide rollout
- Bulk migration, historical data correction, or ongoing data entry
- API integrations, external automation, or custom code
- Security, privacy, or regulatory certification

Current price reduction

Pricing basis	Amount
Original package price previously offered	\$249
20% tier reduction	-\$50
Current reduced package price	\$199

After delivery

- Run the system using the operating guide
- Assign an internal owner for naming and status discipline
- Request a Connected Mini-System if live use demonstrates a real need for related databases

Before you purchase

Privacy, security, and backups

Clients should remove unnecessary sensitive information, maintain a current backup, and confirm that they have authority to share the source material. Flow Work Systems works only within the agreed access and cannot certify that a Notion workspace satisfies a client's legal, regulatory, records-retention, privacy, or security obligations. The client controls final permissions, data retention, and consequential decisions.

Frequently asked questions

Can the scope be expanded?

Yes, after the added work is described and priced in writing. Work does not silently expand inside a fixed package.

Does the delivery target start immediately?

It starts after scope confirmation and receipt of the required access, materials, and decisions. Availability is confirmed before purchase or contract acceptance.

Are results guaranteed?

No. The package delivers the stated system work and guidance. Adoption, efficiency, sales, compliance, and other business outcomes depend on client decisions and use.

Can sensitive data be included?

Share only what is necessary. Use sample or redacted records where possible and never send passwords through ordinary messages or email.

Important pricing note

Prices are starting package prices for the stated scope and are confirmed before work begins. The crossed \$249 amount is the bona fide package price previously offered for this same tier and scope. The current price is \$199, a rounded 20% reduction that saves \$50. Taxes, platform charges, optional add-ons, and work outside the stated scope are not included unless written into the final agreement.

This Standard tier is reduced from the bona fide prior package price of \$249 to \$199, a rounded 20% reduction.
